subodhram3350@gmail.com | LinkedIn: [subodhram](#) | GitHub: [subodh-001](#) | Portfolio: [subodh-portfolio-zeta.vercel.app](#)

SUMMARY

AI-focused software engineer with hands-on experience building GenAI applications, computer vision pipelines, and ML-driven products using Azure OpenAI GPT-4o, Google Gemini, OpenCV, FastAPI, and Python. Shipped and currently operate a live production Web3 product ([alwaystherevault.com](#)) serving real users. Strong foundation in backend engineering (NestJS, FastAPI), REST APIs, and cloud-ready containerized services. AI-first developer using Claude, GitHub Copilot, Cursor, and GPT-4o in daily workflows. Seeking an AI/GenAI Engineer, ML Engineer, or Backend-with-AI role to build production-grade intelligent systems.

Education

MPSTME, NMIMS University

Master of Computer Application (MCA) - CGPA: 7.57/10 (4 Semesters)

Mumbai, India

July 2024 – June 2026

Tolani College of Commerce

Bachelor's of Science in Information Technology (Bsc IT) - CGPA: 8.28/10

Mumbai, India

Sep 2020 – May 2023

Chandrabhan Sharma College

HSC - 74.77%

Mumbai, India

April 2018 – May 2020

S.A Public School

SSC - 66.20%

Mumbai, India

April 2017 – March 2018

Internship & Job Experience

FGTECH Innovation LLP. – Network Engineer

Jan 2026 - Sep 2026

- Implemented firewall policies (pfSense/FortiGate) — NAT, ACL, VPN, and port forwarding.
- Managed and maintained LAN/WAN infrastructure for 100+ users VLANs, OSPF, static routing.
- Monitored network performance, resolved packet loss, latency, and link flapping issues.
- Coordinated with ISPs for leased line uptime, bandwidth, and fault resolution.
- Documented network diagrams, IP schemas, and maintained 99.9% uptime.

Aivariant — Data Analysis Internship | Mumbai, India

Nov 2023 - May 2024

- Cleaned and processed large datasets and performed statistical analysis using Excel & Python.
- Built dashboards and visualizations to present insights and support data-driven decisions.

Projects

AlwaysThere Protocol | Next.js, NestJS, PostgreSQL, Solidity, Web3

Dec 2025

- Built a decentralized digital will platform on Ethereum. Transfers crypto assets automatically when a user goes inactive.
- Backend in NestJS, web in Next.js, mobile in Expo connected via WebSockets for live heartbeat tracking.
- Added fallback verification and encrypted key sharding for secure asset release.
- Live at [alwaystherevault.com](#) with real users and on-chain transactions.
- Storage: Hybrid storage — will documents encrypted and stored on IPFS + Arweave for tamper-proof permanence.
- Security: Wallet-based signature authentication, encrypted key sharding and a two-step fallback verification before any transfer.

TravelExpense.io — Travel Expense Tracker

July 2026

- Full-stack expense tracker with web dashboard, Expo mobile app and REST API.
- Keeps expenses in the same Excel matrix format companies already use.
- Added receipt upload, multi-user support, admin settlement views, monthly KPIs and a WhatsApp bot for logging expenses.
- Migrated Firebase Firestore to Supabase PostgreSQL with a zero-data-loss script.

Technical Skills

AI/ML: Azure OpenAI (GPT-4o), Gemini, prompt engineering, LLM apps, OpenCV, Scikit-Learn, Pandas, Claude, Copilot, Cursor, ChatGPT

Programming Languages: Java, Python, JavaScript, HTML/CSS

Frameworks & Databases: React.js, Node.js, Express.js, Spring Boot | MySQL, MongoDB, Cloud Firestore, PostgreSQL (Supabase)

Developer Tools: Git, VS Code, IntelliJ, Eclipse, Google Colab, Android Studio, Firebase, Jira (Basic)

Network Services Management: TCP/IP, VLAN, OSPF, Static Routing, NAT, ACL, VPN, DHCP, DNS, Firewall, Subnetting

Certifications

- Data Analytics Certification – ExcelR
